plays well enough for an alpha little light on the features as of now. i would say wait till its official realease to get it or get it now if you're impatient like me and dont mind getting bite sized chunks of the game. it's something to keep an eye on though thats for sure!. Okay. So first things first, I absolutely love this game.

There are several different ways to play the game, which are all fun. If you're the devil, you can try and be sneaky, killing them off one by one, or you can be really gung ho about. Both have their advantages, both have their disadvantages.

As the survivors you also have different play styles which revolve around the other players in the game. You can try and work together, you know safety in numbers, which is an extremely valid point which I will explain in a minute, or you can go solo. Because most of the time when you encounter other players, everything devolves into a giant slap fight.

Now as I said there is safety in numbers, because it's near impossible to capture the devil solo. Let me explain. The system by which you capture the devil (and also revive others) is button mashing. You have to mash the hell out of your space bar. It seems very controller-y, so hopefully the game will eventually get full controller support. Because as it is now, I sometimes experience issues where the button mashing doesn't work with controllers.

Something else, this game really gets to you. The first couple times you play the game you'll be a bit confused. But once you've gotten the hang of it, you could end up being the last person alive besides the devil, with four more items to collect, feeling the tension build further with every item collect, and every time you walk through a door wondering "Is this it? Is this the one where the devil's waiting on the other side?".

Some things that I wouldn't really call cons, but I think could use some adjusting:

The Sprinting System - Basically your character can sprint for a couple seconds, and if you step on a puddle or walk over a rock you fall over. That's pretty cool. What isn't cool is that when your character runs out of sprint, rather than just slow down to walk they trip. This is something that is guaranteed to happen. Your character will trip when you run out of sprint, which brings up a problem. The devil can sprint forever, and will only trip due to obstacles, he/she also runs ever so slightly faster than you. So if you get chased by the devil, you have to hope you can escape through some scene transition or you're dead. Because nothing stops the devil from camping by your body once you've fallen over.

The Button Mashing - If this game ever got full controller support, this would be okay, but even then not everyone has a controller. So I think this whole concept needs to be reimagined somehow, because I could totally see this feature being the death of my keyboard.

The Slapping Feature - You can slap any character and they get slapped aside, and have a period where they have to stand back

up and where they are invulnerable. The problem is, slapping itself has no cool down. I've very commonly seen when multiple people are in an area just slapping one another nonstop, not allowing either of them to get their items. I believe that the slap itself should have a cooldown, then people would be less inclined to slap every single person they pass in the halls. After all, wasting that slap on a person only to turn the corner and face the devil would be very bad. That slap could literally be the difference between life and death for them if it had a cooldown. As it is now, when you encounter someone in the hallway, even if neither of you ever stop moving, there is a 90% chance they will slap you.

Now is this game worth ten dollars when it's on sale?
Definetly.

Is this game worth fifteen dollars?
Yes.

I would rate this game as a 7/10

And I would recommend it.. Completely removes the usual boring desktop look.

I have the software open all the time, and i enjoy the way you can keep your own library of favourite wallpapers.

. tl;dr DO NOT BUY THIS GAME IF YOU HAVE EPILEPSY. THIS GAME HAS MANY FLASHING LIGHTS AND RAPIDLY-CHANGING COLORS. I COULD NOT FINISH THIS GAME BECAUSE OF THIS. WHICH IS A DAMN SHAME BECAUSE I ENJOYED THE 67 MINUTES I PLAYED OF IT. IF YOU ENJOY HOTLINE MIAMI, ODDS ARE, YOU WILL ENJOY THIS AS WELL.

APE OUT is a exactly what it says on the tin. You play as an ape, you break out of various buildings, by aping out on various baddies with guns that, for one reason or another, want you dead. The game's style and aesthetic make for a unique experience that make it more than just "Hotline Miami, but you're a gorilla."

The game's jazzy soundtrack and minimalist style work hand in hand; if you're tip-toeing along dark corridors, the music mutes to a gentle Mickey Mouse-like sound with each step. If you're beating the ever loving crap out of a bunch of dudes three by three, it becomes more upbeat and charismatic. This is aided by the game's level design; an early level has you break a power box, leaving the level dark and muted, the soundtrack becoming much more somber and less dramatic; the guards flashlights being an additional help for you to see and find them, and know when they've seen you.

The controls are simple; move gorilla, grab stuff, aim gorilla, and throw. When you die, the game shows you the randomly generated map, the path you took, and where you died. A simple button press skips this and gets you right back into the game. It's not rocket science.

All of this would make a game that I would highly recommend - just so long as you can play it without getting motion sick, a headache, or worse. Even if I can't play this game doesn't mean that someone else can't enjoy it themselves.. A classic RTS, its major distinction being the nearly unattainable 8000 unit capacity. Map options are quite versatile, as are the nations to choose from. The one downside is that MOD1, which brings many improvements, is unavailabe for the Steam version. Nevertheless, Cossacks is an excellent game.. Soccer with tanks.. AYE AYE CAPTAIN

+It's like gothic

-You can't shag Patty. The concept is great, the character progression is fun, but the randomness of stupid elements like "falling rocks" make this game suck real bad.

Real bad.. Very repetitive and slow. Reminds me of basic math drills when I was a child.

Yep I'm a life long gamer. Can't play this thing. Is this a game or a con? Honestly, worst thing EVER. Steam, you should not even have this on your shelf. Bad for your image allowing this stuff to be sold to your customers.. Rough game and well worth the money because of it. Good tower wars game.. As someone who likes sport sims and enjoys the sport of cycling (and rides to work), i find this game quite relaxing and easy to play while doing other stuff. The only downside is the game is essentially the same as it was 10 years ago, with minor tweaks to career mode and the addition of pro cyclist mode.

Note: Pick Team Sky or you will lose.. Really enjoying this game so far! I haven't played much yet, but I can see myself getting way into this game. It's a very simple game but it's super addictive. It also makes full use of room scale. Plus it looks great in VR! Very pretty setting and the dragon looks awesome.

One thing I would like to see is a global leaderboard (I don't think this exists in the game yet?). Also a daily global leaderboard would be really cool, similar to what ZenBlade does. Other than that, I really don't have any suggestions!

My other favorite games for the Vive right now are ZenBlade and QuiVR, also the Lab. I think if you enjoy any of those you will really like this too!. You should play this just for the artwork. Best \$2 ever!. To be completely honest, the ambience was well done, the graphics were well done. But there wasn't much of a story, needed a definate spell. Also the monster wasn't scary at all and the ringing chime sound should be removed and only used for when the monster is near. I was hopeful for a good game but recieved a mediocre game.. Marketing: THIS IS UPLINK BUT MORE FLESHED OUT

Actual game: THIS IS UPLINK BUT FRUSTRATING AND POORLY EXECUTED. For a free Steam game, this is alright. I am able to play it using my Xbox One Controller. My only concern is that it is quilte slow on my computer. I have a 5 year old computer (HP 2000 laptop) so if you have an older computer, then wait until you upgrade. It's an easy way to kill time when it's actually running fast! :D. Don't let my playtime fool you. I owned the IOS version day 1 it was released. Changed 2 phones since then, it is the first APP I download every time. Get this game, you won't regret it.
